

Description of Services

On-Site Care Coordination (OCC) is an on-site treatment support for Florida's Statewide Inpatient Psychiatric Program (SIPP). Care Coordination consists of mental health professionals who review the treatment and discharge plans developed for children and adolescents placed within a SIPP. Care Coordinators facilitate movement to appropriate and less restrictive levels of care, when clinically possible.

The OCC is community-based and has direct contact with local stakeholders and SIPP staff. There is a Care Coordinator identified for each circuit and for each SIPP facility. Fostering relationships and interagency collaboration with the Agency for Health Care Administration (AHCA), Managing Entities, Department of Children and Families (DCF) Substance Abuse & Mental Health, Community-Based Care agencies, local school districts, Department of Juvenile Justice, and social service agencies are important components for Care Coordination and essential to successful SIPP treatment.

Each OCC will interface directly with the Magellan Medicaid Administration Qualified Evaluator Network (QEN), sharing a common data base for all encounters and clinical information, within an electronic record that is easily accessible by each staff member and regularly updated. Care Coordinator's knowledge of community resources and close communications with the SIPP staff enable them to provide a community perspective to all stakeholder and SIPP facilities.

Responsibilities of the OCC

- Interagency/Provider Collaboration
- Resource to Case Managers
- System Coordination and Collaboration
- Resource to the Agency for Health Care Administration

OCC Staff

MISSY GIBSON, LMHC / SUPERVISOR, CARE MANAGEMENT

ADMINISTRATION

Clinical Eligibility Criteria for SIPP

(Children and adolescents under 18 years of age)

- Acute inpatient or intensive outpatient services have failed to bring about sufficient resolution of child's symptoms to permit placement in a less restrictive setting.
- SIPP services can be expected to improve child's problems or prevent further regression.
- Child or adolescent has a serious emotional disturbance.
- Primary DSM 5 diagnosis of a psychiatric disorder requiring intensive residential care. Primary diagnosis cannot be autism, mental retardation or substance abuse.
- Serious functional impairment compared to others in the same age range due to a psychiatric diagnosis.
- Child or adolescent has age appropriate cognitive ability and stability to participate in SIPP and is able to benefit.
- Community setting cannot provide interventions/support needed by child.
- Medical clearance of any acute or intensive ongoing medical needs, due to Federal Exclusion of payment for any other Medicaid benefits while a child is in a SIPP.

Major Goals for SIPP Services

- Stabilization and adequate resolution of problems that necessitated placement in a restrictive setting to allow a child's safe return to the community within 4-6 months.
- Individualized, family centered, culturally sensitive treatment, oriented towards discharge from day of admission.
- Reduction of readmissions to inpatient psychiatric care through quality treatment and extensive aftercare planning.
- Incorporation of permanency goals into the treatment and discharge plans through ongoing coordination with Community Based Care.

Facilities

BAYCARE BEHAVIORAL HEALTH

8132 King Helie Blvd.
New Port Richey, FL 34653
1-727- 841-4200

SIPP Specialty Programs

CITRUS HEALTH NETWORK – CATS

- Male/Female (12-17)
- IL Skills training through on-site OT
- Accepts pregnant teens
- Tri-lingual/cultural (Spanish, Creole)
- Utilizing Building Bridges

DANIEL MEMORIAL

- All male sexual reactive unit
- Music and group art therapy

SIPP Specialty Programs (continued)

DEVEREUX ORLANDO

- Accepts males/females (ages 6-17)
- Strong behavioral component
- Expertise with co-occurring developmental disabilities (Autism Spectrum and Pervasive Developmental Disorder (PDD))
- Accepts children with sexual behavior problems or sexually reactive behaviors
- Psychosexual Evaluations and Juvenile Sex Offender Groups

FLORIDA PALMS ACADEMY

- Male and female ages 6-14
- Accepts children with sexual behavior problems or sexually reactive behavior

PALM SHORES BEHAVIORAL HEALTH CENTER

- Accepts children under 12

SANDY PINES

- Family ROPES, weekly family BBQ
- Children specific unit (5-12)
- Tx for sexually reactive youth
- DBT/EMDR therapies
- Independent living
- Bilingual/Bicultural (Spanish)
- Co-occurring treatment facility

THE VINES

- Accepts children under 10
- Strong behavioral component

UBC

- Male/Female (12-17)
- Male sexually maladaptive/sexual trauma unit
- Accepts pregnant teens
- Pet and equine therapy, family ROPES
- DBT, bio-feedback therapy
